Appendix II

Mines Operated by Kuzbassrazrezugol and Supplying Carbo One

The list of mines operated by Kuzbassrazrezugol are Mokhov, Krasnobrodsky, Taldinskaya, Kaltansky, Bachatskij, and Kedrovskiy coal mines [5] and those which supply Carbo One are Mokhovsky mine and opencast, Krasny Brod, Taldinsky, Kaltansky, Bachatsky, Kedrovsky, Sartaki, Vakhrushevsky, Osinnikovsky, Erunakovsky and Karakansky. [6]

It seems likely that the first six mines supplying Carbo One are operated by Kuzbassrazrezugol and that the different spellings come about due to differential translation of the Cyrillic alphabet into Latin.
